### NOTES:

- Information is also tagged via RIG Manager (such as external boosts and channel).
- Jeff Loomis' tone is accurate, most of the low end is actually coming from the bass guitar.
- Hetfield had a very roomy sound and so that gets captured and accented via the KPA.
- Meshuggah uses a ton of layering and bass to fatten the HUGE tone.
- Don't be afraid to tweak and edit so your setup is more accurate.
- Richard Kruspe was troublesome due to the verb on the track, tweak accordingly.

**Remember... MOST OF THE MAGIC IS IN THE MIX!!!!**
